

## PRESS RELEASE

**MTECH upgrades software offerings to highest level of security.**

**Wednesday, 19<sup>th</sup> November 2008**

**Melbourne, Australia – November 19th, 2008** – MTECH Systems Pty Ltd would like to announce the availability of upgraded high security capability server software for its market leading opti-MET range of software products.

"To meet the requirements of our customers who are concerned about systems security MTECH systems has responded by upgrading our software solutions to run on EAL6+ UNIX operating systems" says Michael Duff, Product Manager, AWOS Systems. "We now offer compatibility with the INTEGRITY™ **UNIX** operating system which has been certified as being EAL6+ by the National Security Agency (NSA) and has the highest rated level of security of any available operating system. By comparison most other commonly used server software only reaches EAL4+ levels which only prevents against "inadvertent and casual" security breach attempts."

This security upgrade option is available on all MTECH opti-MET systems including solutions for ATIS, AWOS, RVR, VOLMET and Tower Automation Systems.
