

# Model 911-GM

## GUYED MAST

### Applications

- WEATHER STATIONS
- REMOTE AIRFIELDS
- TEMPORARY SITES
- DIFFICULT LOCATIONS

### Features

- LIGHTWEIGHT
- EASY TO LOWER
- EASY INSTALLATION
- STABLE
- 10 METRES HIGH

### Description

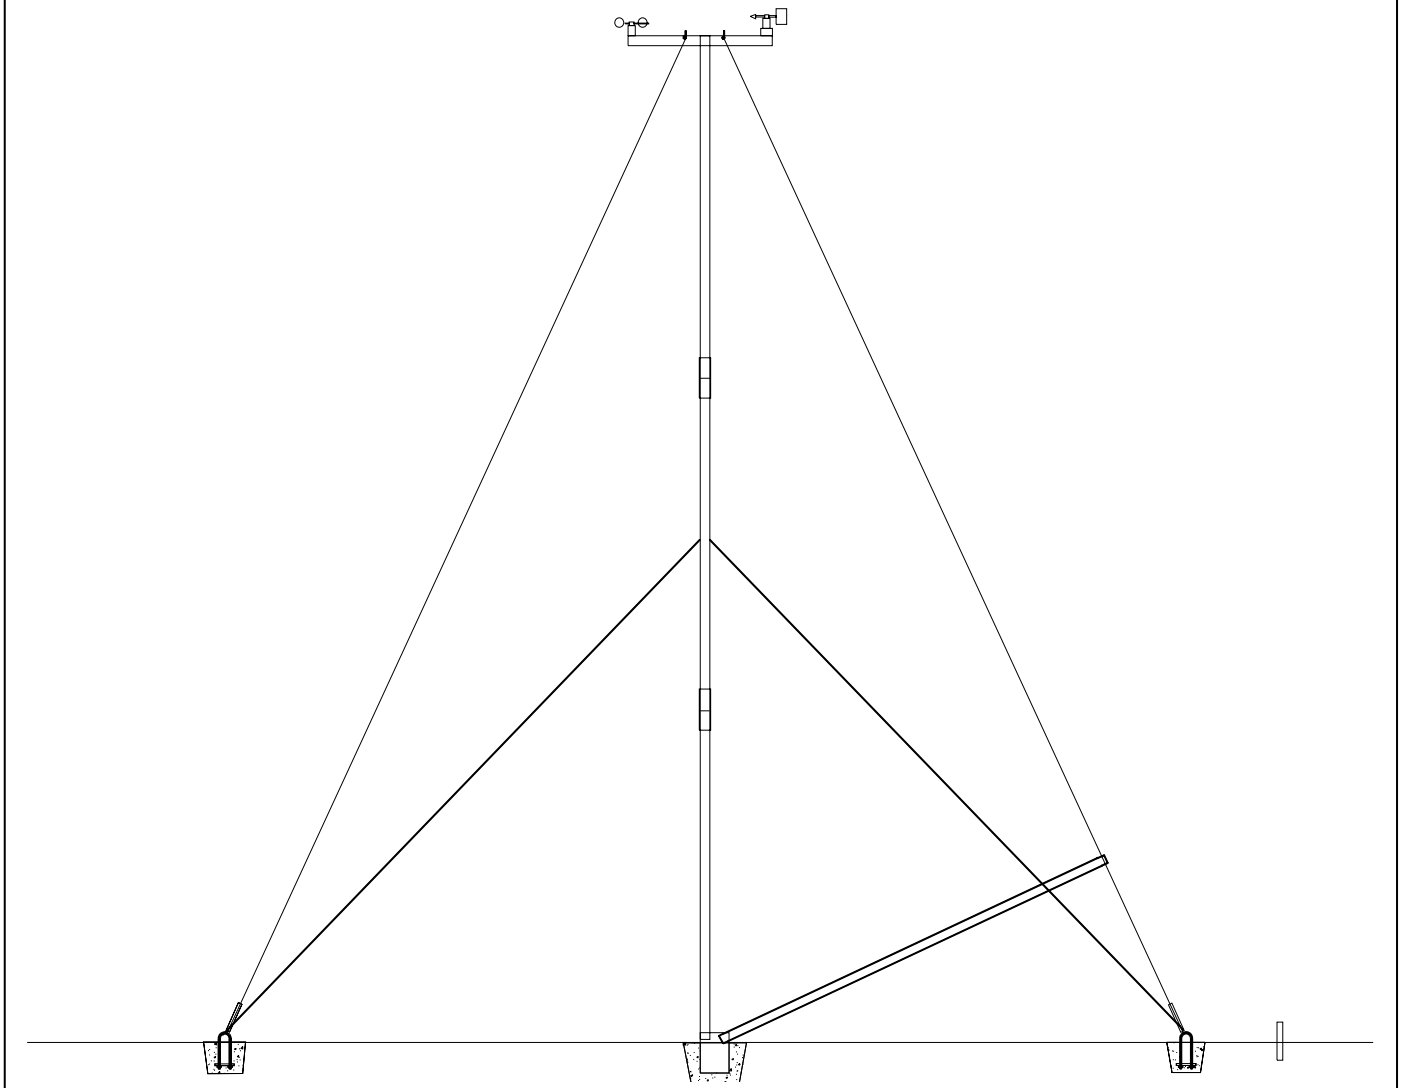

The 911-GM GUYED MAST is intended for deployment in remote sites or temporary tactical situations because of its compact and light weight.

It is also low in cost, both to install and purchase.

The mast comes in 4 main aluminium tubular sections. The longest component is 2.5 meters. This enables the mast to be shipped in a small crate. Erection is simple and only a small amount of concrete is required for the foundations.

The MTECH Systems 911-GM in operation in a remote area of the Himalayas.
